

T1M Portal

User manual: what the system is, how the work flows, and how to use it, step by step.

Mockup for review · all data is demo data

Top1Movers Worldwide Inc. · Operations Portal · Manual v1.0 · October 2026

▪ What is in this manual

1	About the T1M Portal	What it is, who it is for
2	Getting started	Open it and sign in
3	The big picture	The workflow and the five roles
4	A tour of the screen	Menu, search, notifications, My work
5	Worked example: one shipment, start to finish	Nine stages with screenshots
6	Manager and Admin tools	Dashboard, customers, users, settings, audit log
7	The rules the system enforces	Hard gates, required fields, confirmations
8	Who can do what	Role cheat sheet
9	Questions and troubleshooting	Common problems and answers
10	Glossary	Shipping and customs terms in plain words

How to read this manual

If you only have five minutes, read **chapter 3** (the big picture) and skim the screenshots in **chapter 5**. If you are going to try the system yourself, start at **chapter 2** and follow the example in chapter 5 with the same names and numbers.

1 About the T1M Portal

The **T1M Portal** is the operations system for Top1Movers. It keeps every customer request, quotation and shipment job in **one record**, so that nothing lives in chat threads, spreadsheets or somebody's inbox.

What problem it solves

- **Always a next step.** Every inquiry and every job shows what must happen next and who has to do it.
- **Approvals you can see.** Quotes and fund requests go through the Manager. Every version and every reason is kept.
- **No skipping steps.** Job milestones are done in order. Documents, proof and fund approvals are required before the step they belong to.
- **The client stays informed.** The client gets an email link to answer a quotation, and a tracking page for the shipment.
- **Everyone only sees and does their own part.** Sales, Operations and Accounting each get their own simple screens.

What it covers

Area	What you do there
Inquiries & quotes	Record a customer request, prepare a quotation, get it approved, send it, record the client's answer.
Jobs	Run the shipment: accreditation, shipping, customs, trucking, warehousing and LTO, step by step, with documents.
Funds	Ask for cash for duties, port charges and other costs, get it approved and released, then report what was spent.
Customers	One profile per client with every inquiry and job they have had.
Admin	Users and roles, settings, audit log, dashboards.

Good to know

This is a mockup. It is a working preview built to review the design and the process. Sign-in is simulated, nothing is saved on a server, and everything you create **disappears when you refresh the page**. Only the people (demo users) are pre-loaded. Billing, statements of account, payments and profit are **not** part of this portal. Accounting will be integrated later.

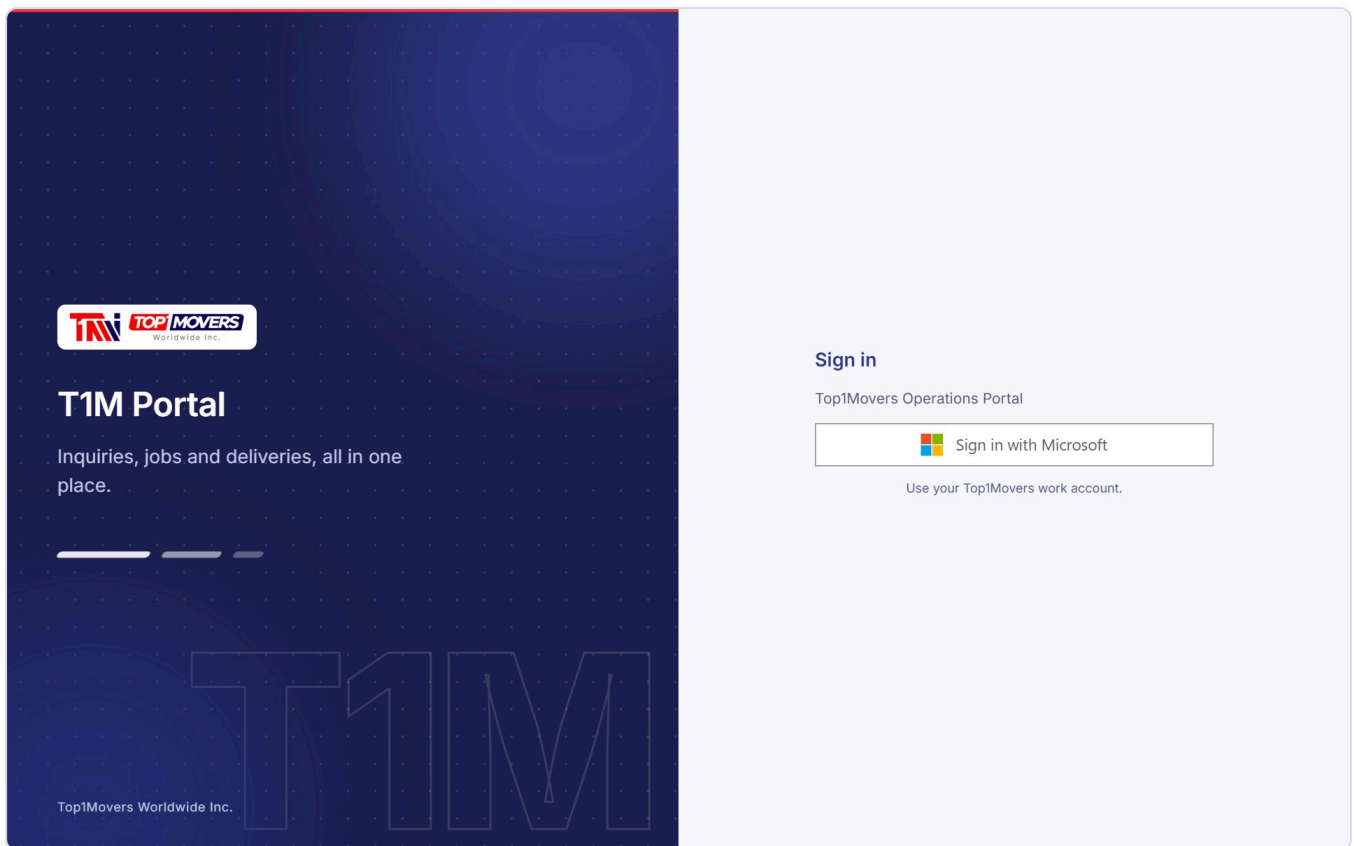

2 Getting started

Open the system

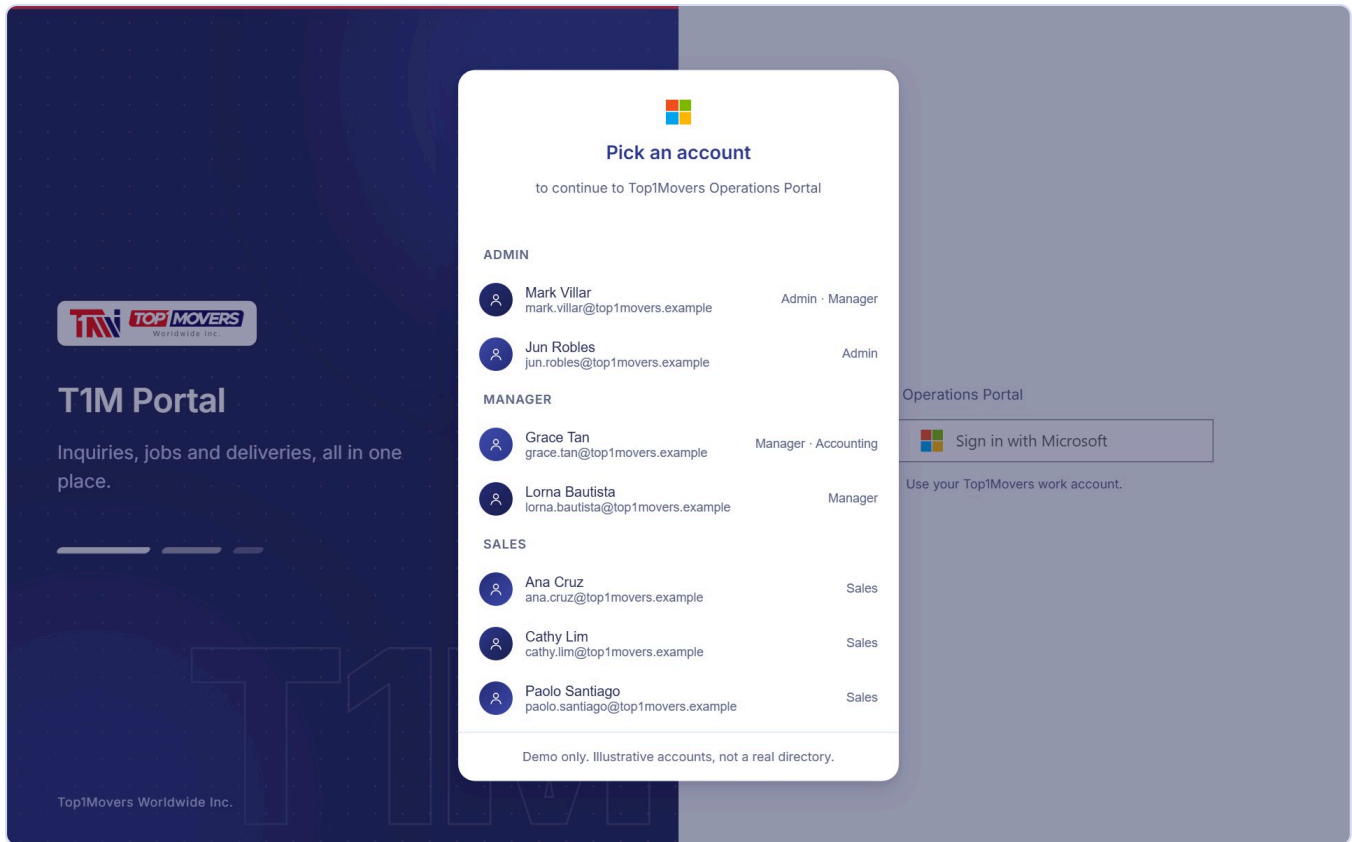

Open the file `apps/mockup/index.html` in a web browser (Chrome or Edge works best). No installation is needed.

Sign in

1. On the sign-in page, click **Sign in with Microsoft**.
2. A list of demo people appears, grouped by role. This stands in for the Microsoft account picker. Click the person you want to be.
3. You land on your home screen. To try another role, use the avatar menu (top right) and choose **Switch person (demo)**.

The sign-in page.

Pick a demo person. In the real system this would be your Top1Movers Microsoft work account.

Who to sign in as

Role	Try this person	Good for trying
Manager (and Accounting)	Grace Tan	Creating inquiries, approving quotes and funds, converting jobs, confirming completion.
Manager	Lorna Bautista	Same as above, without the Accounting role.
Sales	Ana Cruz	Uploading quotations and following inquiries.
Operations	Ben Santos (accreditation), Rico Domingo (freight), Jessa Aquino (customs), Mike Salazar (trucking)	Running the job steps. Each person only works the services assigned to them.
Accounting	Paolo Reyes	Approving fund release and reviewing liquidations.
Admin	Mark Villar or Jun Robles	Users, roles, settings, audit log. Admin can open everything.

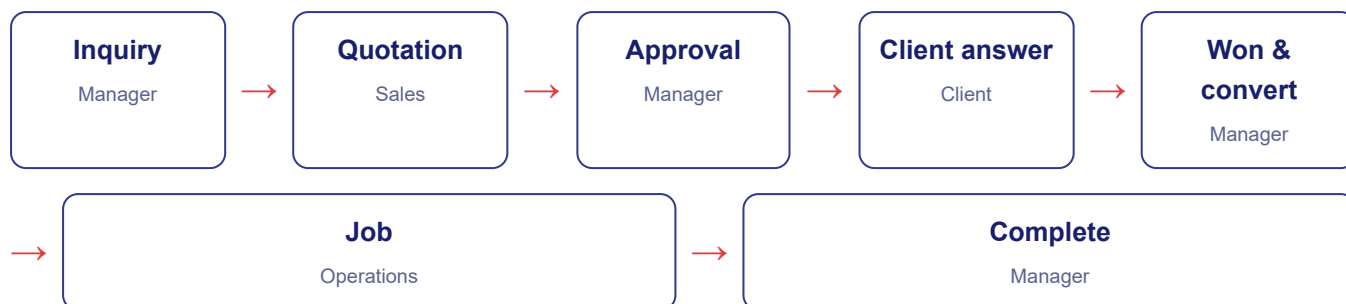

Tip

The easiest way to learn the system is to play **one shipment** from start to finish, switching person at each stage, exactly like chapter 5.

3 The big picture

The life of a shipment

Every shipment goes through the same path. Each box below is a stage, and the line under it says who does the work.

Stage	What happens	It ends when
1. Inquiry	A client asks for a service. The Manager records the customer and the request, and assigns one Sales person.	The inquiry exists and Sales is assigned.
2. Quotation	Sales prepares the quotation in their usual format and uploads it with the amount and how long it is valid.	Sales submits it for approval.
3. Approval	The Manager reviews it. They approve it, or reject it with a reason.	Approved: the system emails it to the client automatically.
4. Client answer	The client opens the link in the email and chooses Accept, Renegotiate or Decline.	The client answers.
5. Won and convert	If accepted, the Manager closes the inquiry as won and converts it into a job, assigning Operations staff for each service.	The job exists.
6. Job	Operations works the job step by step. Money is requested through fund requests when a step costs cash.	Every step and document is done.
7. Complete	Operations submits the job for closing. The Manager confirms it is completed.	The job is Completed.

Two paths that go the other way

Renegotiate or Decline: Sales prepares a new version of the quotation (v2, v3 ...) with the client's reason in front of them. The Manager can also close the inquiry as lost, with a reason, which feeds the sales statistics.

Issue on a job: Operations can flag an issue. The job goes on hold and its steps are frozen until the issue is resolved.

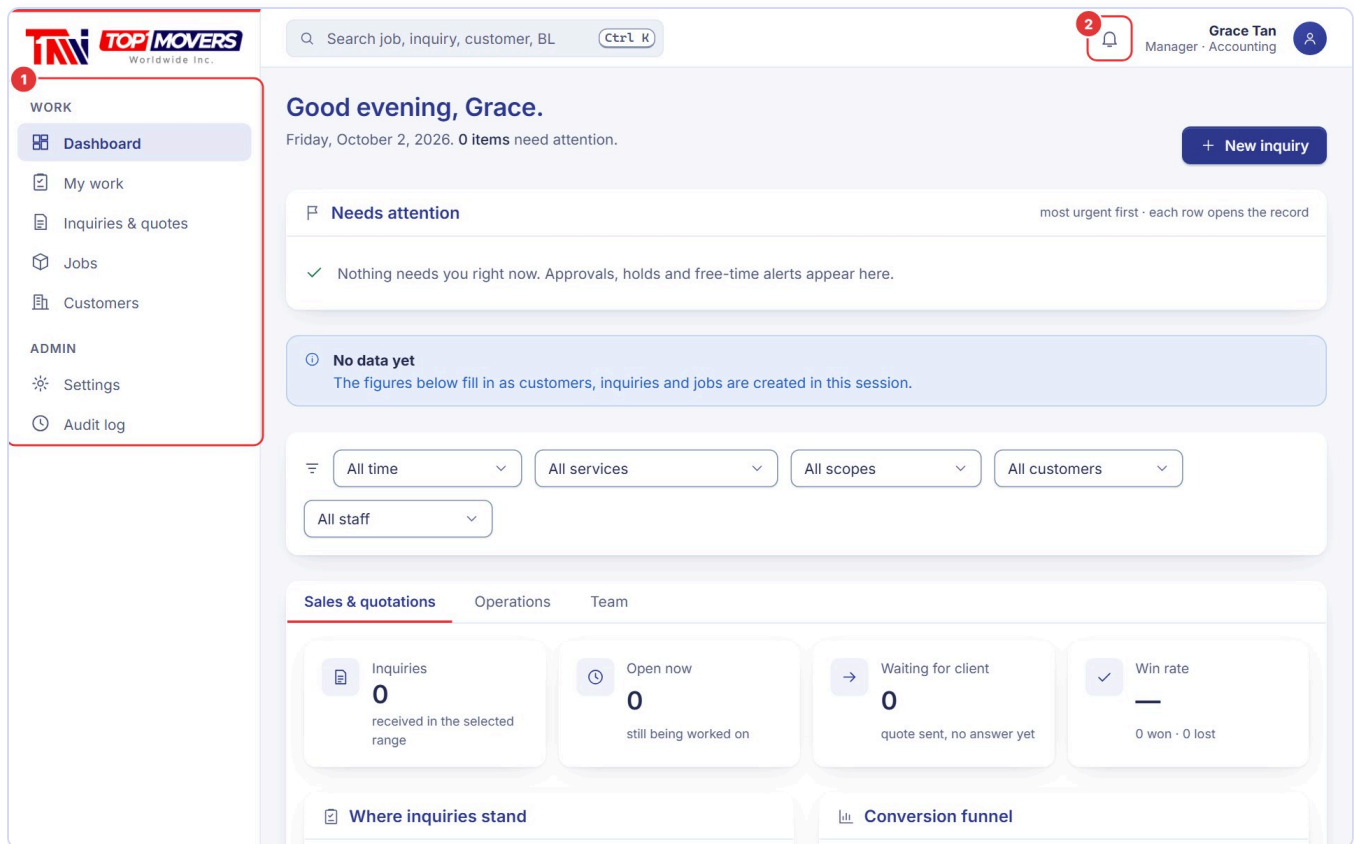

The five roles

Role	In one sentence
Admin	Looks after users, roles and settings. Can open and do everything.
Manager	Creates customers and inquiries, assigns people, approves quotations and fund requests, converts jobs and confirms completion.
Sales	Prepares and uploads quotations and follows their inquiries until the client answers. Sales does not work on jobs.
Operations	Runs the jobs: marks steps done, uploads documents, requests funds and reports what was spent. Only for the services they were assigned.
Accounting	Approves fund release, reviews liquidations and records receipts and quotations.

One person can hold more than one role. For example Grace Tan is both Manager and Accounting.

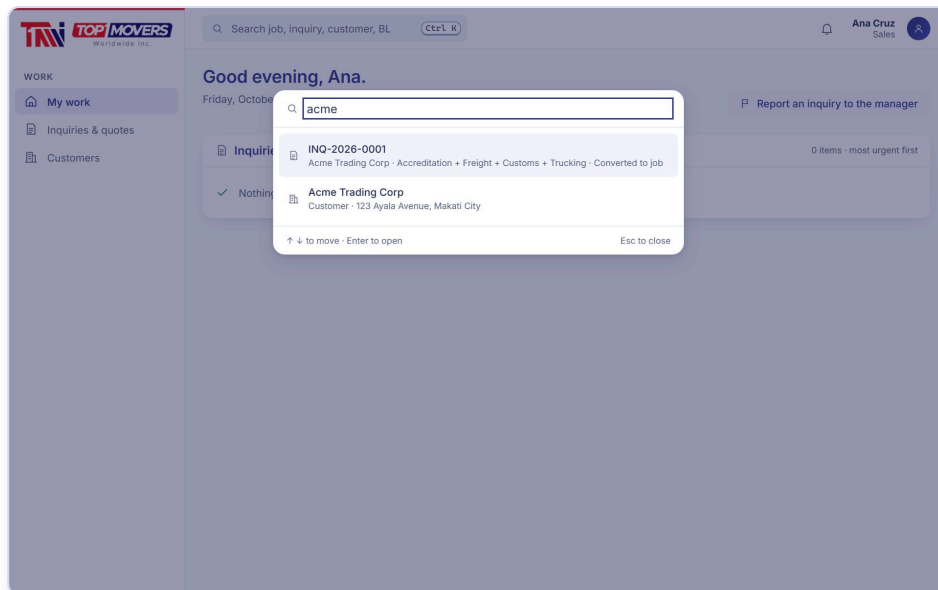

4 A tour of the screen

Every screen has the same layout. Learn it once and you can find your way everywhere.

1 the menu on the left, 2 the notification bell. The search bar is at the top and your name and role at the top right.

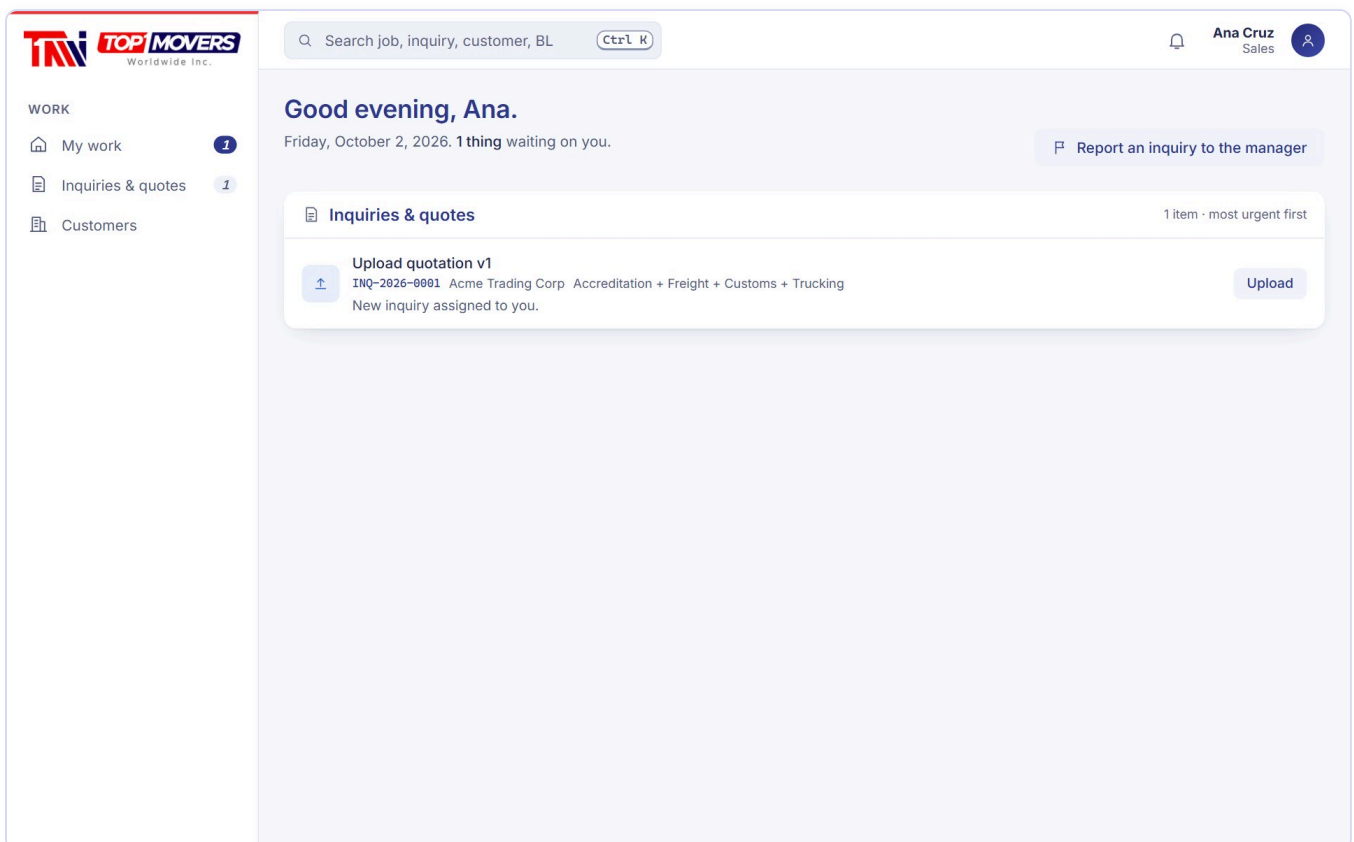

Part	What it does
Menu (left)	Shows only what your role can use. Managers see Dashboard, Inquiries & quotes, Jobs, Customers. Admins also see Users & roles, Settings and Audit log.
Search (top)	Click it or press Ctrl + K . Type a job number, inquiry number, customer name or BL number and press Enter.
Bell	Shows how many notifications you have not read. Click it to read them. The counter goes back to zero once you have opened it.
Your name (top right)	Opens a small menu to switch person (demo) or sign out.

Search finds jobs, inquiries and customers from anywhere in the system.

My work: your to-do list

Sales, Operations and Accounting land on **My work**. It lists only the things waiting on **you**, most urgent first. Click a row to open it.

Sales: inquiries waiting for a quotation. Sales can also report a new inquiry to the Manager.

Notifications

When something happens that involves you (an assignment, an approval, an answer from the client), a notification is created. Open the bell to read them.

Notifications. In the real system the same messages would also be emailed.

Little helpers you will notice

- ***** A **red star** next to a field name means the field is **required**. Fields marked *optional* can be left empty.
- **Confirmation windows.** Before anything important is saved (approving, releasing funds, marking a step done) the system asks you to confirm.
- **Toast messages.** A small message appears in the corner after you save, telling you what happened.
- **Side panels.** Most forms open in a panel on the right. Press Cancel or the X to close it without saving.

5 Worked example: one shipment, start to finish

The story we will follow

Acme Trading Corp (contact: Juan Dela Cruz) wants to **import 2 pickup trucks from Yokohama, Japan** to Quezon City. They need importer accreditation, shipping, customs clearance and delivery by truck. We follow the request through nine stages. The names are the demo users, so you can repeat every step yourself.

1

Record the customer and the inquiry

Manager Grace Tan

Goal: the request is in the system and one Sales person owns it.

1. Go to **Customers** and click **New customer**. Fill in the company name, contact person, address, phone and email.
2. Click **New inquiry** (top right of the Dashboard or of Inquiries & quotes).
3. Pick the **Customer**. Choose **Scope** (Domestic or International) and, for International, the **Direction** (Import or Export).
4. Tick every **service** the client needs. The form then asks only for the details those services need (for example route, delivery address).
5. Add optional **Notes**, then choose the **one** Sales person who will prepare the quote.
6. Click **Create inquiry** and confirm. The inquiry gets a number, for example INQ-2026-0001, and Sales is notified.

The screenshot displays the T1M Portal interface. On the left is a sidebar with 'WORK' (Dashboard, My work, Inquiries & quotes, Jobs, Customers) and 'ADMIN' (Settings, Audit log) sections. The main content area shows a dashboard for 'Grace' with a 'Needs attention' section indicating 'Nothing needs your attention right now'. A 'New inquiry' modal is open on the right. It contains fields for 'Customer' (Acme Trading Corp), 'Scope' (Domestic/International), 'Direction' (Import/Export), and 'Services needed' (Importer Accreditation, Freight Forwarding, Customs Clearance, Trucking / Delivery, Warehousing & Distribution, LTO Transaction). Below these are 'THE REQUEST' fields for 'From' (e.g. Yokohama, JP) and 'To' (e.g. Quezon City, PH). At the bottom right of the modal is a '+ Create inquiry' button. Red annotations are present: a red circle with '1' around the Customer dropdown, a red circle with '2' around the Services needed checkboxes, and a red circle with '3' around the Assigned Sales field (partially visible at the bottom).

New inquiry. 1 customer, 2 services, 3 assigned Sales (further down).

INQUIRY	CLIENT	SERVICES	ASSIGNED	VERSION	AMOUNT	STATUS
INQ-2026-0001 02 Oct 2026	Acme Trading Corp Accreditation + Freight + Customs + Trucking	Accreditation + Freight + Customs + Trucking International · Import	Ana Cruz	—	—	Preparing quote

The inquiry now appears in the list with the status *Preparing quote*.

Tip

Sales can also start it. If a client contacts Sales first, Sales uses **Report an inquiry to the manager** (description and a supporting document are required). The Manager then sees it under *Needs attention* and creates the inquiry from it.

Report an inquiry to the manager

A manager creates the inquiry and assigns staff. This tells them about it.

2

Prepare and upload the quotation

Sales Ana Cruz

Goal: the quotation file is uploaded and waiting for approval.

1. Open **My work** or the inquiry. The big panel says **Upload quotation v1**.
2. Prepare the quotation in your usual format (PDF, Excel or Word) outside the system, then click the button.
3. Attach the **file**, enter the **total amount** (the currency is fixed to PHP) and the **valid until** date.
4. Click **Submit for approval** and confirm.

Version history QT-2026-0001

No quotation uploaded yet.

Upload quotation v1

The inquiry page. 1 the next step button.

The screenshot shows the T1M Portal interface. On the left, a sidebar lists 'My work', 'Inquiries & quotes', and 'Customers'. The main area displays 'Inquiries & quotes' for 'INQ-2026-0001'. A 'NEXT STEP' section titled 'Upload quotation v1' is visible. A modal window titled 'Upload quotation v1' is open, showing a form with the following fields: 'Quotation file' (with a file upload icon and 'sample-quotationfile.pdf'), 'Total amount' (480000), 'Currency' (PHP), and 'Valid until' (10/17/2026). A 'Submit for approval' button is at the bottom right of the modal.

Upload quotation v1. The file, amount and validity date are required.

Good to know

The amount and date are for tracking and reports only. **The file is what the client receives.**

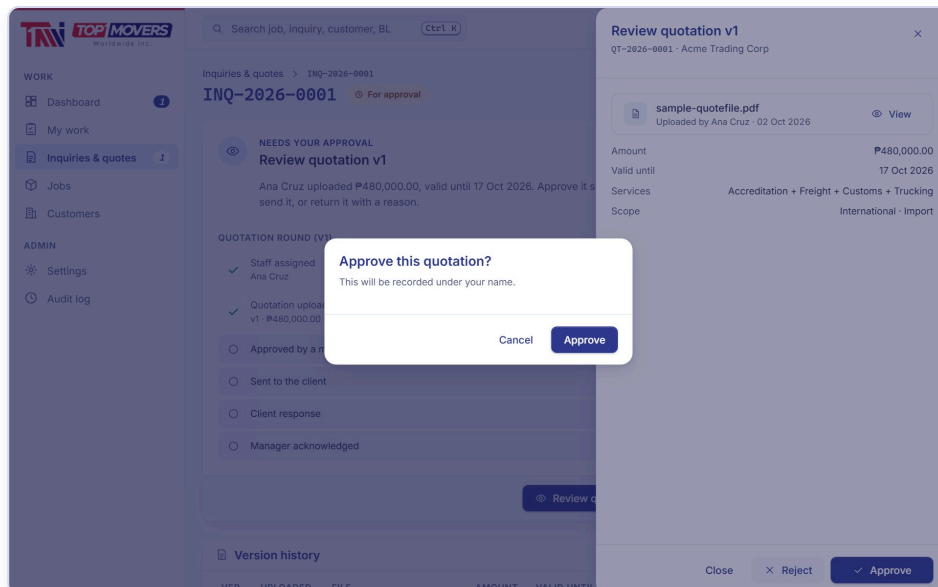

3

Approve the quotation

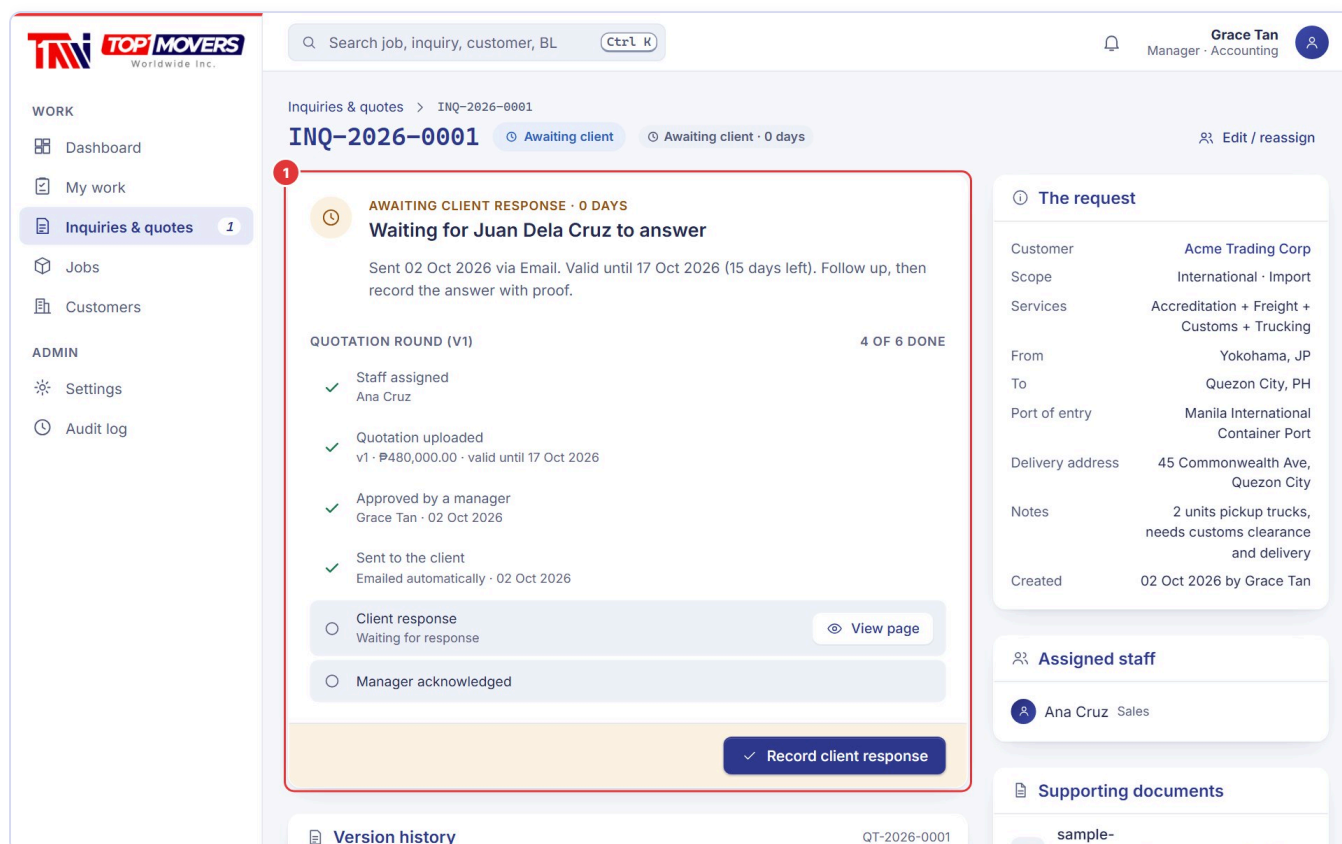

Manager Grace Tan

Goal: a checked quotation goes to the client without anyone sending it by hand.

1. The quote appears under **Needs attention** on the Dashboard. Click **Review**.
2. Look at the file, amount, validity and services.
3. Click **Approve (2)** and confirm. **Or** click **Reject (1)**: a window asks you what is wrong and you must write a reason.
4. When approved, the system **emails the client automatically**. The inquiry now shows *Sent to the client* as done and *Client response: waiting for response*.

Every approval asks you to confirm first.

After approval: the quotation is sent and the system waits for the client. **1** the status and the View page button.

Good to know

If you reject, the reason is stored in the quotation history and Sales sees it in a highlighted box when preparing the next version.

4

The client answers

Client no login needed

Goal: the client accepts, asks to renegotiate or declines, from a link in their email.

The client receives an email with a link. In this mockup you open the same page with the **View page** button next to *Client response* on the inquiry. A banner reminds you it is a simulation and has a button to go back.

1. The client sees the quotation: file, amount, validity and services.
2. They choose **Accept**, **Renegotiate** or **Decline**.
3. For Renegotiate and Decline a **Reason** box appears and is required. The client just types it.
4. They click **Send my answer** and confirm. The answer is recorded and the Manager and Sales are notified.

Quotation

QUOTATION QT-2026-0001

Your quotation is ready

Acme Trading Corp

Quotation v1

sample-quotefile.pdf
Prepared by Top1Movers [View](#)

Amount	P480,000.00
Valid until	17 Oct 2026
Services	Accreditation + Freight + Customs + Trucking

Your answer

What the client sees when they open the link.

Renegotiate (or Decline) asks for a reason.

The client confirms before the answer is sent.

If the client does not accept

The inquiry shows **Revision needed** with the client's reason highlighted. Sales uploads v2 (the old version stays in the history) and the cycle repeats from stage 3. If it is clearly lost, the Manager uses **Close as lost** and picks a reason.

5

Close as won and convert to a job

Manager Grace Tan

Goal: the accepted quotation becomes a job with the right people assigned.

1. Open the inquiry. It says **Client accepted**. Click **Acknowledge and close** and confirm. The inquiry is now **Won** and the version history is locked.
2. Click **Convert to job**.

3. **Assign Operations staff for each service.** The form shows one box per service on the inquiry (for example Accreditation, Freight, Customs, Trucking). Pick one or more Operations people for each.
4. Choose the **Cargo type** (FCL, LCL, RoRo, Air, Bulk, Breakbulk or Land). A short description under the box explains each type.
5. Click **Create job** and confirm. The job gets a number such as SJ-2026-00001 and a tracking code for the client.

Closing the inquiry locks the version history and makes it ready to convert into a job.

Cancel **Acknowledge & close**

Closing the inquiry as won.

Convert to job. Each service gets its own Operations staff.

Good to know

Why one person per service? It keeps the work separated. Only the people assigned to a service can mark that service's steps done. A Manager can step in for any.

6

Run the job

Operations Ben, Rico, Jessa, Mike

Goal: every step of every service is done, in order, with the right documents.

The job page has a **Progress map** at the top and a **Next step** panel below it. You never have to guess what to do next.

The screenshot shows the T1M Portal interface for a new job. The top navigation bar includes the T1M logo, a search bar, and user information for Grace Tan. The left sidebar lists various work and admin functions. The main content area displays the job details for SJ-2026-00001, which is marked as 'On track'. The 'Progress map' section shows four phases: 1. Importer accreditation (0 of 4 done), 2. Shipping to the Philippines (0 of 4 done), 3. Customs clearance (0 of 6 done), and 4. Delivery to the consignee (0 of 4 done). The 'CURRENT PHASE' section provides a detailed view of the '1. IMPORTER ACCREDITATION' phase, showing steps like 'Requirements complete', 'Filed with BOC', 'Under evaluation', and 'Approved'. It also includes a 'Free time' section with details on port and container free time.

A new job. The Progress map shows every phase of the shipment.

Reading the Progress map

- **All phases** shows the big stages (for example 1 Importer accreditation, 2 Shipping, 3 Customs, 4 Delivery) with a count of steps done. **Click a phase** to review its steps.
- **Current phase** shows the steps of the phase you are in. Done steps are filled in. The *Lane assigned* step takes the colour of the lane the customs bureau picked: green, yellow or red.

Marking a step done

1. Open the job. The **Next step** panel names the step and lists what is needed first.
2. If a document is needed **before** the step (for example SEC / DTI registration), upload it from the button on the panel. Steps cannot be done until it is in.
3. Click **Mark done**. Enter the date and anything the step asks for (see the table below). Fields with a red star are required.
4. Click **Mark done** and confirm. The next step becomes active.

PHASE 1 OF 4 · IMPORTER ACCREDITATION · STEP 1 OF 4

7 Funds: when a step costs cash

Operations

Manager

Accounting

Goal: money is requested, approved, released and accounted for before the step that needs it.

Some steps cannot be done until the money for them has been released. The **Next step** panel shows a row such as *Funds for shipping line charges released* with the status of the request.

PHASE 2 OF 4 · SHIPPING TO THE PHILIPPINES · STEP 4 OF 4

Next: D/O released

Local charges paid; the shipping line issued the Delivery Order so the cargo can be collected. Funds for the shipping line charges must be released first.

SHIPPING TO THE PHILIPPINES

3 OF 5 DONE

Funds for shipping line charges released

Request a "Shipping line local charges" fund request first

Request funds

D/O released

Request funds

D/O released is blocked until funds are released. The panel offers **Request funds**.

The five moves of a fund request

Move	Who	What they do
1. Request	Operations	Click Request funds . The purpose is already filled in. Add the amount, who to pay, when it is needed and the funding source.
2. Approve	Manager	Review the request and approve it, or reject it with a reason (Operations can edit and resubmit).
3. Approve release	Accounting	Choose the mode (cash, check, bank transfer), the date and the reference number. Proof is optional. Reference is not needed for cash.
4. Liquidate	Operations	Only the person who made the request. After paying, enter the amount actually spent and attach the receipts.
5. Review liquidation	Accounting	Check the receipts against the amount. Any excess is returned or any shortfall reimbursed. Then the request is verified.

Cash needed during the job. Manager approves, Accounting releases, Operations liquidates with receipts, Accounting verifies.

REQUEST	PURPOSE	AMOUNT	STATUS
FR-1 Rico Domingo · 02 Oct 2026	Shipping line local charges Required for the "D/O released" step Pay to Maersk Philippines · needed by 03 Oct 2026 · Company funds	₱60,000.00	⌚ For approval 👁 Review

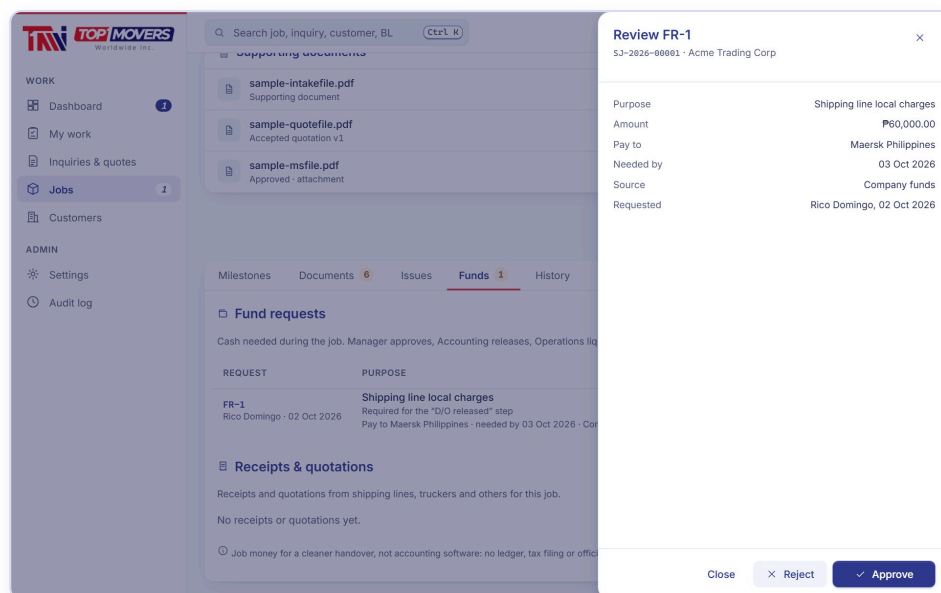

Receipts & quotations

+ Add receipt or quotation

Receipts and quotations from shipping lines, truckers and others for this job.

No receipts or quotations yet.

🕒 Job money for a cleaner handover, not accounting software: no ledger, tax filing or official invoices.

Approve release of FR-1
S3-2026-00001 - approved by Grace Tan

Purpose: Shipping line local charges
Amount: ₱60,000.00
Pay to: Maersk Philippines
Needed by: 03 Oct 2026
Source: Company funds
Requested: Rico Domingo, 02 Oct 2026

Mode: Bank transfer
Reference no.: Check or transfer no.

Released on: 10/02/2026

Proof optional
Click to choose a file, or drag it here
Voucher, check copy or transfer slip
Use a sample file (demo)

Cancel Approve release

Accounting approves the release.

Liquidate FR-1
S3-2026-00001 - ₱60,000.00 released 02 Oct 2026

Actual amount spent: PHP 60000

Official receipts: Click to choose a file, or drag it here
Receipts for everything paid
Use a sample file (demo)

Note optional
e.g. Excess returned to cashier

If you spent less, return the excess; if more, Accounting reimburses the shortfall. Accounting checks it when verifying.

Cancel Submit liquidation

Operations reports what was spent and attaches the receipts.

02 Oct · Jessa Aquino

Lane assigned

02 Oct · Jessa Aquino · lane Green

Duties paid (proof needed)

BOC released

Port charges paid

Gate pass

Request funds

The same gate protects *Duties paid*, which needs a Duties & taxes request.

Which step needs which request

D/O released → Shipping line local charges. **Duties paid** → Duties & taxes. **Port charges paid** → Port charges (arrastre, wharfage, storage). **Fees paid** (LTO) → LTO fees. Each request only unlocks its own step.

8

When something goes wrong

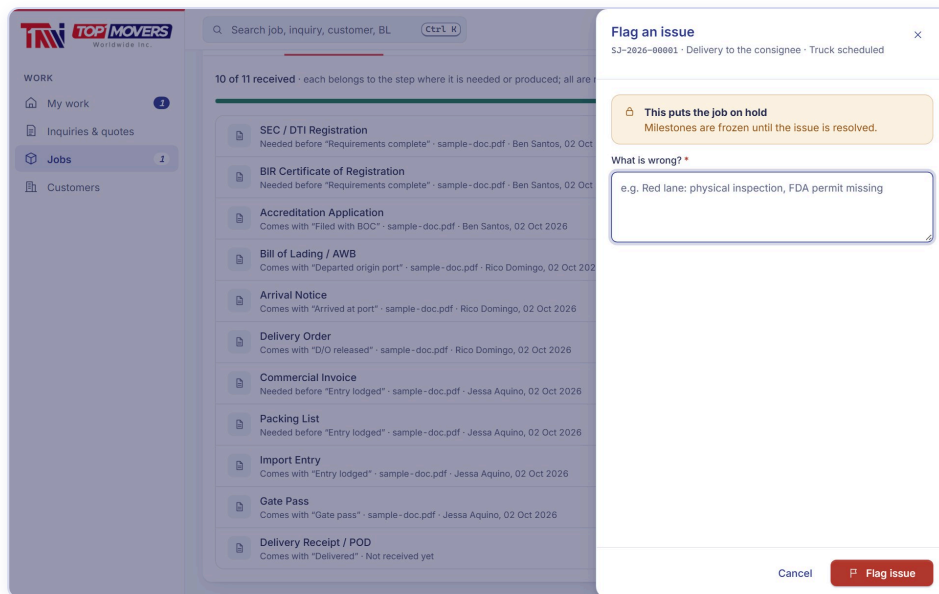

Operations

Manager

Goal: a problem stops the job safely instead of being ignored.

1. Operations opens the job menu (**More**) and chooses **Flag an issue**.
2. Describe what is wrong and confirm. The job goes **on hold** and its steps are frozen. The Manager is told.

- When it is fixed, Operations or the Manager clicks **Resolve issue** and writes how it was fixed. The job moves again.

Flagging an issue puts the job on hold.

9

Close the job

Operations

Manager

Goal: the job is formally completed.

- When the last step is done, the panel says **All milestones done** with a closing checklist: milestones done, required documents received, no open issue.
- Operations clicks **Submit for closing** and confirms.
- The Manager opens the job, reviews the checklist and clicks **Confirm completed**. The job shows **Completed**.

ALL MILESTONES DONE

Submit for closing

A manager confirms the job is completed.

CLOSING CHECKLIST

3 OF 3 DONE

- ✓ All milestones done
- ✓ All required documents received
- ✓ No open issue

1

Submit for closing

Operations submits the job for closing. 1

The screenshot displays the T1M Portal interface. On the left is a sidebar with navigation links: WORK (Dashboard, My work, Inquiries & quotes, Jobs, Customers), and ADMIN (Settings, Audit log). The main content area shows a job summary for 'SJ-2026-00001' by 'Acme Trading Corp'. It includes a 'Progress map' with three phases: 1. Importer accreditation (4 of 4 done), 2. Shipping to the Philippines (4 of 4 done), and 3. Customs clearance (6 of 6 done). Below this, the 'CURRENT PHASE' is '4. DELIVERY TO THE CONSIGNEE', with sub-tasks: 'Truck scheduled' (02 Oct), 'Picked up at port' (02 Oct), and 'Delivered' (02 Oct). A modal window titled 'Confirm job completed' is open on the right. It lists the same three checklist items as the previous screen: 'All milestones done', 'All required documents received', and 'No open issue'. A note states 'Completing marks the job as done.' At the bottom of the modal are 'Cancel' and 'Confirm completed' buttons.

The Manager confirms completion.

6 Manager and Admin tools

Dashboard

Managers and Admins land on the **Dashboard**. **Needs attention** lists what waits for you. Below it are simple numbers in three tabs: **Sales & quotations**, **Operations** and **Team**. Use the filters (time, service, scope, customer, staff) to narrow them.

The Dashboard. The Sales tab shows open inquiries, who we are waiting for, and the win rate.

Number	Meaning
Inquiries	How many requests were received in the selected range.
Open now	Inquiries still being worked on.
Waiting for client	Quote sent, no answer yet. Turns amber when there are some.
Win rate	Won out of won plus lost.
Where inquiries stand	A count at each stage: preparing, waiting for approval, waiting for the client, accepted, won, lost.
Conversion funnel	How many inquiries became quotes and how many became wins.

The audit log.

The client tracking page

Every job has a **tracking code** (under *Key facts* on the job page). The client opens the tracking page and enters the code to see progress in plain words. It never shows money, staff names or documents. Use **Client view** on the job page to preview it.

The screenshot displays the 'Shipment tracking' page for a completed job. At the top, the T1M logo and 'TOP MOVERS' are visible. The tracking code 'TRACKING T1M-QGTR-EZQQ' is shown. The status 'Completed' is prominently displayed with a green checkmark and '18 of 18 steps done'. A progress bar indicates the route from 'Yokohama, JP' to 'Quezon City, PH'. Below this, a 'Progress' section lists four completed steps: 'Importer accreditation', 'Shipping to the Philippines', 'Customs clearance', and 'Delivery to the consignee', all dated '02 Oct 2026'. A 'Shipment details' section at the bottom provides a breakdown of 'CARGO' and 'SERVICES'.

7 The rules the system enforces

These rules are built in. They are why the system protects against mistakes.

Rule	What it means for you
Steps are done in order	You cannot jump ahead. Only the current step can be marked done.
Documents come first	If a step needs a document, the step is locked until it is uploaded. If a step produces a document, you upload it while marking the step done.
Fund gates (hard)	D/O released, Duties paid, Port charges paid and LTO Fees paid cannot be marked done until the matching fund request is approved and released.
Required fields	Fields with a red star must be filled. The system tells you which one is missing.
Confirm before saving	Approving, rejecting, releasing funds, marking steps done, closing and similar actions ask you to confirm.
One Sales owner per inquiry	An inquiry is assigned to one Sales person, who prepares its quotations.
Operations by service	Operations staff are assigned per service on each job and only work their own service's steps.
Only the requester liquidates	Only the person who requested the funds can report what was spent.
Only a Manager replaces documents	Received documents can be viewed by everyone with access. Replacing one is a Manager action.
Quotation currency	Quotations are in PHP.
Every change is recorded	Each inquiry and job has a history. Versions of quotations are kept, with the reasons for returns.

What Accounting does and does not do here

In this portal Accounting **approves fund release**, **reviews liquidations** and **records receipts and quotations**. There is no billing, statement of account, payment tracking or profit in the portal. These will be added when the accounting system is integrated.

8 Who can do what

* Liquidation is only ever done by the person who requested the funds.

9 Questions and troubleshooting

My data disappeared.

This is a mockup. Data lives in the browser tab and is lost when you refresh or close it. Only the demo people stay. Create the customer and inquiry again.

I cannot see Jobs (or another menu item).

The menu only shows what your role can use. Sales, for example, does not see Jobs. Switch person from the avatar menu.

The Mark done button is missing or says Request funds / Upload.

The step has something to do first: a document to upload, or a fund request to get approved and released. Read the first row of the Next step panel.

It says only certain staff can update this step.

Operations are assigned per service. Ask the Manager to assign you, or sign in as the assigned person.

I clicked Mark done but nothing happened.

Look for red messages under the fields. A required field (red star) is empty, such as the driver name or a proof file.

Why can't I liquidate this fund request?

Only the person who requested the funds can liquidate them.

How do I see what the client sees?

On the inquiry, click **View page** next to Client response. On a job, use **Client view** under Key facts.

How do I go back to the start?

Refresh the page. Everything you created is cleared.

Where is billing?

Billing, statements of account and payments are not part of this portal. They will come with the accounting integration.

A quick checklist for a good demo

1. Sign in as **Grace Tan** and create a customer and an inquiry for Sales **Ana Cruz**.

2. Switch to **Ana Cruz** and upload a quotation.
3. Switch back to **Grace Tan**, approve it, then open the client page and choose Accept.
4. As Grace Tan, close it as won and convert it, assigning Ben, Rico, Jessa and Mike.
5. Switch between those four people and work the steps. Try a fund-gated step.
6. As **Paolo Reyes** approve the release, then finish the job and confirm it as the Manager.

10 Glossary

Term	In plain words
Inquiry	A client's request for a service, before any quotation.
Quotation (quote)	The price offer sent to the client. It can have several versions.
Job	The actual shipment work, created once the client accepts.
Milestone / step	One thing that must happen on a job, done in order.
Progress map	The picture of all the phases and steps of a job.
Importer accreditation	Registering the client with the Bureau of Customs so they can import.
BOC	Bureau of Customs.
BL / AWB	Bill of Lading (sea) or Air Waybill (air): the transport contract and receipt for the cargo.
D/O (Delivery Order)	The paper from the shipping line that lets the cargo be collected from the port. It is issued after the line's local charges are paid.
Lane (Green, Yellow, Red)	What the customs bureau decides for the shipment: Green = no check, Yellow = documents reviewed, Red = physical inspection.
Duties and taxes	The amount paid to customs to release the cargo.
Arrastre	The fee for handling cargo at the pier.
Wharfage	The fee for cargo passing through the wharf.
Storage / port free time	Days the cargo can stay at the port free of charge. After that, storage is charged each day.
Demurrage / detention	Charges when a container stays too long out of the shipping line's hands (see container free days).
FCL / LCL	Full container load / less than container load (shared container).
RoRo	Roll-on/roll-off: vehicles are driven onto the ship.
POD	Proof of delivery, signed by the receiver.
LTO	Land Transportation Office: vehicle registration.
Fund request	A request for cash needed to pay a cost on a job.
Release	Accounting approving that the requested money is given out.
Liquidation	Reporting how the money was spent, with receipts.
Tracking code	A private code the client uses on the tracking page to see progress.

End of manual. If something in the system looks different from this manual, the system is newer. The

screenshots can be refreshed at any time from the live build.
