

Scenario manual

How a shipment moves through the Top1Movers Operations Portal, told as eight situations

How to read this manual

Each scenario starts with **the situation**: a short story about what is happening in the business and who has to act. Then come the **steps**. Every step explains what to do and why, shows the real screen, and tells you what you should see afterwards.

On the screenshots, **red numbered arrows** point to what to click or fill in, in the order of their numbers. A red number on the corner of a box means the same thing when arrows would have covered text. You do not need any logistics background: the words you will meet are explained where they first appear.

Which scenario should I read?

#	Scenario	Who does the work	Main sample jobs
1	A brand-new customer asks for a quote	Dispatcher (Ana Cruz)	Creates SJ-2026-00123
2	Keeping paperwork and status moving	Dispatcher (Ana Cruz)	SJ-2026-00095, 00110, 00088
3	Customs trouble	Manager (Grace Tan)	SJ-2026-00130, 00065
4	Delivery day	Warehouse Crew (Ben Santos)	SJ-2026-00077
5	Whose money is it? Funds, surprise costs, handoff to Finance	Manager, then Finance (Paolo Reyes)	SJ-2026-00120, 00070, 00060
6	Who did what? Audit trail and access	Admin (Mark Villar)	All jobs
7	People come and go: users, roles and access	Admin, Manager, then Dispatcher	SJ-2026-00082
8	What the customer sees	Customer (no account)	SJ-2026-00065

The scenarios build on each other in the order listed, and reading them in order tells the whole story of a shipment: winning the work, moving it, handling problems, delivering, settling the money, proving what happened, and handling people joining and leaving, and keeping the customer informed.

Before you begin

Open `apps/mockup/index.html` in Chrome or Edge (double-click the file). Nothing is installed and nothing is saved. **Refresh the page (F5) to restore the original sample data** whenever you want to start a scenario from scratch. The portal's clock is fixed at **Monday 28 September 2026**, so every "overdue" and "days left" you see assumes that date.

Signing in

Sign-in is simulated. Click **Sign in with Microsoft** (1), then pick a person from the list (2). Each person has a different role, and the portal shows only what that role needs.

Arrows: (1) Sign in with Microsoft

Arrows: (1) the account to use, here Ana Cruz, the dispatcher

Switching person or signing out

Click your **avatar** in the top-right corner. **Demo: switch role** (1) lets you change person without signing out and keeps all the data you have created, which is handy when a scenario hands work from one person to the next. **Sign out** (2) returns you to the sign-in page.

Arrows: (1) Demo: switch role, (2) Sign out

Who is who

Person	Role	Lands on	In one line
Ana Cruz	Dispatcher	My Tasks	Runs customers, inquiries, quotations, jobs, documents and tasks. Sees no money.
Ben Santos	Warehouse Crew	My Tasks	Field work on phone or tablet. Sees only the jobs assigned to him. Confirms deliveries.
Grace Tan	Manager	Dashboard	Oversight: approves problems, controls customs holds, manages the client's money, hands jobs to Finance.
Mark Villar	Admin	Dashboard	Everything a manager does, plus users, roles and the permission table.
Paolo Reyes	Finance	Dashboard	Read-only view of jobs, charges, summaries and the audit trail.
Customer	No account	Tracking page	Sees shipment status only.

SCENARIO 1

A brand-new customer asks for a quote

THE SITUATION

Test Freight Co. has never worked with Top1Movers. Its contact, Lea Ramos, wants to bring one 20-foot container of insured goods from Shanghai to Pasig. Ana, a dispatcher, has to set the customer up, log the request, send a price, record the client's approval and open the shipment job. On paper, the same details would be typed into a spreadsheet, an email and a folder. In the portal they are typed once.

WHO DOES THE WORK

Dispatcher: Ana Cruz

YOU END UP WITH

Shipment job **SJ-2026-00123**, status Booked, with its documents and to-do list created automatically.

1 Register the customer

Every shipment belongs to a customer, so start there. Open **Customers** and add the new company with a contact and a delivery address. Only the name is required. If a customer with the same name already exists, the portal warns you about a possible duplicate instead of quietly creating a second record.

Arrows: (1) New customer

Arrows: (1) Save customer

You should see: a message that the customer is saved, and the Customers counter in the menu rising from 5 to 6.

2 Log the inquiry

In **Inquiries & Quotations**, register what the customer is asking for: which customer, the cargo, where it starts (the foreign port), the port of entry in the Philippines and the final destination.

The screenshot shows the Top Movers Operations Portal interface. On the left is a sidebar with navigation options: OPERATIONS, My Tasks, Dashboard, Customers (6), Inquiries & Quotations (4), and Shipment Jobs (12). The main content area is titled 'Inquiries & Quotations' with the subtitle 'Digital commercial-to-operations handoff.' A red box highlights the '+ Register inquiry' button, with a red arrow and the number 1 pointing to it. Below the title is a table with columns: INQUIRY, CUSTOMER, CARGO, and ASSIGNED TO.

INQUIRY	CUSTOMER	CARGO	ASSIGNED TO
INQ-2026-0041	Sample Trading Co.	Canned goods, 2×20ft container	Ana Cruz
INQ-2026-0042	Golden Harvest Exports Inc.	Frozen goods, 1×40ft reefer	Cathy Lim

Arrows: (1) Register inquiry

The screenshot shows the 'Register inquiry' form in the Top Movers Operations Portal. The form is open on the right side of the screen, with a red box highlighting the 'Register inquiry' button at the bottom. A red arrow and the number 1 point to this button. The form contains the following fields:

- Customer: Test Freight Co.
- Cargo description: Insured goods, 1×20ft
- Origin (foreign port): Shanghai, CN
- Port of entry: Manila, PH
- Destination: Pasig, PH

Arrows: (1) Register inquiry (submit)

You should see: the inquiry gets its own number (INQ-2026-0045), status New, assigned to Ana. The portal flags information still missing, here the container type, so gaps are visible from the start.

3 Send a price

Open the inquiry and create the quotation. Version 1 is created for you. If the customer negotiates, use **Add revision** and every earlier version stays on record.

Arrows: (1) Create quotation

You should see: quotation QT-2026-0044, version v1, PHP 150,000, status **Pending customer approval**.

4 Record the customer's approval (conforme)

In this business a customer accepts a quotation by signing it. That signed acceptance is called the **conforme**. Record who approved and on which date. Until this is done, the quotation cannot become a job.

Arrows: (1) Record customer approval / conforme

Record customer approval

Approved by
Lea Ramos

Date
28 Sep 2026

Save conforme

Arrows: (1) Save conforme

You should see: a green box reading **Customer approval recorded** with the name and date.

5 Turn the quotation into a job

One button creates the shipment job. The next page lists everything that carries over, so nobody has to retype it. Check it and confirm.

QT-2026-0044
Test Freight Co.

Approved

Customer approval recorded
Approved by Lea Ramos on 28 Sep 2026 (Recorded in portal).

Convert to Shipment Job

Arrows: (1) Convert to Shipment Job

Arrows: (1) Create Shipment Job

You should see: the message **Shipment Job SJ-2026-00123 created.**

6 Meet the Shipment 360 page

This page is the home of one shipment. Look at (1) its status, Booked, (2) the button that moves it to the next stage, and (3) the tabs for tasks, documents, exceptions, delivery and charges. The history already records who created the job and from which quotation. All five required documents begin as **Missing** and the standard to-do list has been created.

THE SITUATION

Three shipments need attention. Golden Harvest's job **SJ-2026-00095** has one document waiting for review, one rejected and one missing. Meridian's job **SJ-2026-00110** is brand new with no documents at all. Pacific Rim's ship, job **SJ-2026-00088**, has just reached Manila. Ana has to get the paperwork moving and keep the status truthful so that colleagues and customers see the real position.

WHO DOES THE WORK

Dispatcher: Ana Cruz

YOU END UP WITH

Documents approved, uploaded and rejected with a reason; a proof-backed task completed; a shipment moved to Arrived at Port, and the customer's page already showing it.

1 Read the paperwork checklist

Open **SJ-2026-00095** and its **Documents** tab. Every required document is one row with a status. The button at the end of the row depends on the status: (1) **Review** for a document waiting to be checked, (2) **Replace** for a rejected one, whose reason is written under its name, and (3) **Upload** for one that is still missing.

The screenshot displays the Top1Movers Operations Portal interface. On the left is a sidebar with the company logo and navigation links: OPERATIONS, My Tasks, Dashboard, Customers (6), Inquiries & Quotation (5), and Shipment Jobs (13). The main area shows the 'Documents' tab for job SJ-2026-00095. At the top right, there's a search bar and user info for Ana Cruz. Below, a summary card shows 'Import' with a 'DECLARED VALUE' of ₱920,000.00 and a 'PRIORITY' of 'High'. The document list below has the following items:

Document Name	Status	Action
Commercial Invoice v1	Approved	View
Packing List v1	Approved	View
Bill of Lading v1	Pending Review	Review (1)
Certificate of Origin v2 — rejected: Signature block expired — reissue with current authorized signatory.	Rejected	Replace (2)
Import Permit v0	Missing	Upload (3)

Arrows: (1) Review, (2) Replace, (3) Upload

You should see: status pills of Approved, Pending Review, Rejected and Missing.

2 Approve a document

Review opens a panel where you approve or reject. Approve when the document is correct.

Arrows: (1) Approve

You should see: the Bill of Lading changes to Approved and its button becomes View.

3 Upload a missing document

Open **SJ-2026-00110**, Documents tab, and use **Upload** on a missing document. Attach the file and submit.

Arrows: (1) the attached file, then Upload

You should see: the Packing List becomes **Pending Review**, version 1, and the dashboard's missing-documents count drops by one.

4 Reject a document, with a reason

Choose **Review** on the document and then **Reject**, and explain what is wrong. The portal refuses a rejection without a reason, so the person who has to fix it always knows what to do. A rejected document then offers **Replace**.

Arrows: (1) the reason, (2) Reject

You should see: the document marked **Rejected**, with your reason under its name.

5 Complete a task that needs proof

Open **SJ-2026-00088** and its **Tasks** tab. Tasks tagged **evidence required** cannot be completed without attaching a file. Choose **Complete** on the task, attach the proof, add a note if you want, and confirm.

The screenshot shows the Top1Movers Operations Portal interface. On the left, the 'OPERATIONS' sidebar includes 'My Tasks', 'Dashboard', 'Customers' (6), 'Inquiries & Quotation' (5), and 'Shipment Jobs' (13). The main area displays the 'Tasks' tab for job SJ-2026-00088. The task list includes:

TASK	OWNER	DUE	STATUS	ACTIONS
Verify shipment documents complete (evidence required)	Ana Cruz	—	✓ Completed	View evidence
Lodge customs entry (evidence required)	Ana Cruz	04 Oct 2026	1 Pending	Complete Reassign
Pay duties and assessment (evidence required)	Ana Cruz	05 Oct 2026	⌚ Pending	Complete Reassign
Secure delivery order	Ana Cruz	06 Oct 2026	⌚ Pending	Complete Reassign
Book delivery truck	Ana Cruz	07 Oct 2026	⌚ Pending	Complete Reassign

Arrows: (1) Complete on Lodge customs entry

The screenshot shows the 'Complete task' modal for the 'Lodge customs entry' task. The modal includes a 'Completion evidence' section with a file 'boc-entry.pdf' attached. Below this is a 'Note (optional)' section with the text 'Filed with BOC'. At the bottom, there is a 'Mark complete' button. Red arrows indicate the steps: (1) the proof file and (2) the 'Mark complete' button.

Arrows: (1) the proof file, (2) Mark complete

You should see: status **Completed** and a **View evidence** link. If you forget the file the portal says: *Attach the completion evidence first.*

6 Move the shipment forward

Update status offers only the next stage, so nobody can skip ahead by accident. Confirm the move from Sailed to Arrived at Port.

Arrows: (1) Confirm, move to Arrived at Port

You should see: a new **Status changed** entry in the job history.

7 Check what the customer sees

Use **Client tracking page** on the job. This is the page customers get, with no login. The headline already reads **Arrived at port**, with no phone call and no email.

Arrows: (1) the customer's headline

You should see: friendly wording only. Internal details are never shown to customers.

THE SITUATION

Grace, the operations manager, starts her day on the dashboard and finds two customs problems. Sample Trading's container (**SJ-2026-00130**) was picked by customs for a physical inspection, called a Red lane, and is on hold. Golden Harvest's job (**SJ-2026-00065**) has an open exception: the commodity code on the invoice does not match the Bill of Lading. Both are frozen until a manager acts.

WHO DOES THE WORK

Manager: Grace Tan

YOU END UP WITH

The hold cleared and customs moved forward on one job, and the exception approved on the other, with a named person assigned to fix it.

1 Start from the dashboard

The cards (1) are the day's headlines: active jobs, overdue tasks, missing or rejected documents, open exceptions, billing-ready jobs and jobs short on funds. Every row in the lists further down is clickable and jumps straight to the problem. The numbers here include the job created in Scenario 1.

Arrows: (1) the summary cards

2 Release a customs hold

Open **SJ-2026-00130**. The red box explains the hold. Only a manager or admin can clear it; a dispatcher sees the hold but has no button for it. Clear it (1) once customs has finished.

The screenshot shows the 'Shipment Jobs' page for SJ-2026-00130. The 'JOURNEY PROGRESS' bar is at 50% (stage 5 of 9). The current stage is 'Customs Clearance'. Below this, the 'Customs Clearance detail' section shows a sub-process flow: Lodging Pending, **Lodged**, Assessment Pending, Payment Pending, Payment Completed, Release Pending, and Released. The 'Lodged' step is highlighted with a red box and a red arrow pointing to it from the 'Status history' section. The 'Status history' shows a message: '27 Sep 2026 2:15 PM Status changed — Moved to Customs Clearance. (Ana Cruz)'.

Arrows: (1) Clear hold

You should see: a message that the hold was cleared, and an entry in the job history naming Grace.

3 Move customs forward

Customs has seven small steps, from Lodging Pending to Released. Advance one step at a time; the portal only offers the next one. Between assessment and payment it asks **whose move it is**, Top1Movers or the client, so the team knows who to chase.

The screenshot shows the 'Shipment Jobs' page for SJ-2026-00130. The 'JOURNEY PROGRESS' bar is at 50% (stage 5 of 9). The current stage is 'Customs Clearance'. Below this, the 'Customs Clearance detail' section shows a sub-process flow: Lodging Pending, **Lodged**, Assessment Pending, Payment Pending, Payment Completed, Release Pending, and Released. The 'Payment Pending' step is highlighted with a red box and a red arrow pointing to it from the 'Status history' section. The 'Status history' shows a message: '28 Sep 2026 Customs hold cleared — Under Inspection cleared. (Grace Tan (Manager))'.

Arrows: (1) Advance customs stage

Arrows: (1) Confirm the next stage

You should see: the track moving on one step, and the change recorded in the history.

4 Approve an exception and assign the fix

Open SJ-2026-00065, its **Exceptions** tab, and review the problem (1). Name the corrective task and its owner, then approve (3). A dispatcher can raise an exception but only a manager or admin can approve it.

Arrows: (1) Review

Arrows: (1) corrective task, (2) owner, (3) Approve & assign

You should see: the message **Exception approved; task assigned**. The job leaves Exception Hold, the new task lands on the owner's list, and Open exceptions on the dashboard falls to 0.

THE SITUATION

The truck carrying Meridian Import Export's container (**SJ-2026-00077**) has reached the consignee's warehouse in Pasig. Ben works on a phone or tablet in the yard. He has to confirm that the goods were delivered, who received them, and attach a proof of delivery. Without that proof the shipment cannot be closed or billed.

WHO DOES THE WORK

Warehouse Crew: Ben Santos

YOU END UP WITH

The job marked **Delivered**, with the receiver and proof of delivery on record.

1 Find the delivery to confirm

Ben's home page lists his own tasks. Below them is **Deliveries to confirm**. He sees only jobs assigned to him, not the whole company.

The screenshot shows the Top1Movers Operations Portal interface for Ben Santos, Warehouse Crew. The left sidebar includes the company logo and navigation options: OPERATIONS, My Tasks (selected), and Shipment Jobs (13). The main content area features a search bar and a list of tasks. Below the task list is a section titled 'Deliveries to confirm' with a count of 1. This section contains a table with columns: JOB, CUSTOMER, DESTINATION, and STATUS. The table lists a single job: SJ-2026-00077, Meridian Import Export Ltd., Pasig, PH, with a status of 'Out for Delivery'. A red box with a circled '1' highlights the 'Confirm + POD' button next to the status.

JOB	CUSTOMER	DESTINATION	STATUS
SJ-2026-00077	Meridian Import Export Ltd.	Pasig, PH	Out for Delivery

Arrows: (1) Confirm + POD

2 Confirm with proof

Enter who received the goods (1), attach the proof of delivery (2) and confirm (3). Switch on the damage option if anything arrived broken or incomplete. The portal refuses to confirm without the receiver's name or the file.

Confirm delivery — SJ-2026-00077

Delivery date
28 Sep 2026

Received by
J. Ramos (Receiving)

Proof of delivery
proof-of-delivery.pdf

☐ Damage or incomplete delivery

Damage description

Confirm delivery

Arrows: (1) Received by, (2) proof of delivery, (3) Confirm delivery

3 Done

The delivery leaves the list and a message confirms it. The job is now **Delivered**, and the customer's tracking page shows the delivery with its proof.

My Tasks
Ben Santos · Warehouse Crew

Due now (1)

JOB	TASK	CUSTOMER	DUE

SJ-2026-00077	Return empty container	Meridian Import Export Ltd.	09 Oct 202
SJ-2026-00065	Deliver to consignee (evidence required)	Golden Harvest Exports Inc.	09 Oct 202

✓ Delivery confirmed in full.

You should see: the message **Delivery confirmed in full.**

Whose money is it? Funds, surprise costs and the handoff to Finance

THE SITUATION

Top1Movers pays duties and freight for clients first, then bills them back, like a personal shopper who pays up front. Two jobs show why tracking that money matters. Golden Harvest's **SJ-2026-00120** has a duty of PHP 18,400 due on 30 September, but only PHP 10,000 of the client's money is left, and port storage fees start in two days. Sample Trading's **SJ-2026-00070** has a storage fee of PHP 6,800 that was never in the approved quotation. Grace deals with both. Later, Paolo in Finance reads a finished job.

WHO DOES THE WORK

Manager: Grace Tan, then Finance: Paolo Reyes

YOU END UP WITH

A shortfall fixed, a surprise cost decided, a job handed to Finance, and Finance reading the summary.

1 Spot the shortfall

Open the job's **Charges** tab. The amber banner (1) says in plain words what is due, what is on hand and when fees start. The button (2) records new money from the client. Below it, the **client funds** notebook shows Money in, Money spent and Left over.

The screenshot shows the Top1Movers Operations Portal interface. On the left is a sidebar with navigation links: OPERATIONS (Dashboard, Customers, Inquiries & Quotation, Shipment Jobs), and ADMIN (Audit Trail). The main content area shows the 'Charges' tab for a job. At the top right, there's a search bar and a user profile for Grace Tan. Below the search bar, there's a summary of the job: PORT OF ENTRY (Batangas, PH), IMPORT / EXPORT (Import), DECLARED VALUE (₱760,000.00), and PRIORITY (Normal). The 'Charges' tab is active, and it shows an amber banner (1) with a 'Short on funds' warning. Below the banner is a button (2) labeled '+ Add funds received'. Below the banner is a 'Client funds' section with a button labeled '+ Add funds received'.

Arrows: (1) the shortfall warning, (2) Add funds received

2 Record the client's deposit

Enter the amount and bank reference and attach the deposit slip. The warning disappears at once and **Left over** rises. The ledger below keeps every movement of money in date order.

Client funds

+ Add funds received

MONEY IN
₱116,000.00

MONEY SPENT
₱96,000.00

LEFT OVER
₱20,000.00

MONEY SPENT SO FAR
₱96,000.00 of ₱116,000.00 received

The final balance is worked out after delivery.

Arrows: (1) Left over, now PHP 20,000

You should see: the banner and the job's warning chip gone, and "Jobs short on funds" on the dashboard back to 0.

3 Decide what to do with a surprise charge

On **SJ-2026-00070**, the section **Needs client approval** lists costs that were not in the approved quotation. Either (1) mark **Client approved** after the client agrees, or (2) **Absorb cost** with a written reason, so Top1Movers takes the loss knowingly. The job cannot go to Finance until this is settled.

Arrows: (1) Client approved, (2) Absorb cost

You should see: the charge showing a green **Client approved** tag with who approved it and when.

4 Hand the job to Finance

When every line of the billing checklist shows **Done**, **Mark Ready for Finance** becomes available. (Before this screenshot we completed the last open task, Return empty container.)

Arrows: (1) Mark Ready for Finance

You should see: the message that the job is billing ready, and its status changing to Billing Ready.

5 Finance reads the summary

Paolo has a read-only view. On a billing-ready job (**SJ-2026-00060** here) he opens the **Billing Summary**: what the client sent, what Top1Movers spent, its own fees and the final balance, in this case a refund due to the client. **Print / Export** gives a clean page. It is a summary for handoff, not an invoice, and is labelled a mock document.

The screenshot shows the Top1Movers Finance interface. On the left is a sidebar with 'OPERATIONS' (Dashboard, Shipment Jobs 13) and 'ADMIN' (Audit Trail). The main content area has a search bar and a user profile 'Paolo Reyes · Finance'. Below this is a 'BY CATEGORY — SHARE OF ALL CHARGES' section with a bar chart showing Freight (86%), Duties & Taxes (12%), Fees (2%), and Other (0%). A 'Billing Summary' section follows, labeled 'Mock document', with a description: 'A clean, printable Finance handoff summary — job, customer, charges, funds and margin. Not a client-facing invoice.' A red arrow points to the 'Open Billing Summary' button. Below this is a 'Charges & expenses' table with columns: DESCRIPTION, CATEGORY, TYPE, PAYMENT, EVIDENCE, and AMOUNT.

Arrows: (1) Open Billing Summary

This screenshot shows the same Billing Summary page, but with a red arrow pointing to the 'Print / Export' button in the top right corner. A yellow warning box is visible, stating 'Mockup only' and 'Sample document for internal Finance handoff — not a real invoice. All figures are illustrative.' The 'Billing Summary' title and 'Mock document' label are also present.

Arrows: (1) Print / Export

You should see: Finance's menu shows only Dashboard, Shipment Jobs and Audit Trail, and there is nothing to edit.

THE SITUATION

Weeks later somebody asks: who approved that extra cost, and when? Mark, the system administrator, opens the audit trail. Because it could hold thousands of records, it can be filtered by date. He also checks who is allowed to do what.

WHO DOES THE WORK

Admin: Mark Villar

YOU END UP WITH

The relevant entries found, filtered by date range, and the role permissions reviewed.

1 Open the audit trail

Every action is recorded with the date, the person and their role, what happened and to which job, newest first, in pages. The entries you see here are the ones created by the earlier scenarios, each stamped with the real person who did it. The date filter (1) sits at the top right.

Arrows: (1) the date range filter

2 Filter by dates

Use a preset such as **Last 7 days** (1), or click two days on the calendar to choose your own range, then press **Done** (2).

Arrows: (1) Last 7 days, (2) Done

You should see: the header line showing how many events fall in the range.

3 Check who can do what

Users & Roles lists staff with their department, role and an on/off switch. Below it, the permission matrix (1) shows which role can use which area. It is marked Illustrative because the final rules are still to be agreed with the client.

MODULE	DISPATCHER	WAREHOUSE CREW	MANAGER	ADMIN	FINANCE
Customer Mgmt	✓	—	✓	✓	—
Inquiry & Quotation	✓	—	✓	✓	—

Arrows: (1) Permission matrix

THE SITUATION

Nina Lopez is joining Top1Movers' finance team, and Cathy Lim, a dispatcher, is leaving. Mark, the admin, has to give Nina an account and switch Cathy's off. But Cathy still owns tasks, including one that is already overdue on BlueWave's job **SJ-2026-00082**. Grace, the manager, hands that work to Ana so nothing falls through the cracks. Along the way the portal makes sure that people only reach the pages their role allows.

WHO DOES THE WORK

Admin: Mark Villar, then Manager: Grace Tan, then Dispatcher: Ana Cruz

YOU END UP WITH

Nina added, Cathy switched off, Cathy's overdue task on Ana's list, and proof that a role cannot open pages outside its permissions.

1 Add a new person

Only an admin sees **Users & Roles**. Choose **Add user**, then give the person's name, department and role and confirm. The role decides what the person will see and be allowed to do, as shown in the permission matrix from Scenario 6.

Arrows: (1) Add user

Arrows: (1) name, (2) role, (3) Add user

You should see: the message **Nina Lopez added** and a new active row in the list.

2 Switch an account off

Every person has an on/off switch on their row. Turning it off does not erase anything: their past actions stay in the audit trail. In this mockup the account simply stops being offered at sign-in.

The screenshot shows the 'Users & Roles' page in the TopMovers Operations Portal. The left sidebar contains 'OPERATIONS' (Dashboard, Customers, Inquiries & Quotation, Shipment Jobs) and 'ADMIN' (Users & Roles, Audit Trail). The main content area is titled 'Users & Roles' with a subtitle 'Controlled access and accountability.' and an '+ Add user' button. Below this is a table of users with columns: NAME, DEPARTMENT, ROLE, and STATUS. The table lists several users, including Cathy Lim, who is currently 'Active'. A red box and arrow labeled '1' point to the toggle switch for Cathy Lim's status.

NAME	DEPARTMENT	ROLE	STATUS
Ana Cruz	Manila Ops	Dispatcher	Active
Ben Santos	Warehouse	Warehouse Crew	Active
Cathy Lim	Manila Ops	Dispatcher	Active
Rico Domingo	Warehouse	Warehouse Crew	Active
Grace Tan	Management	Manager	Active
Paulo Reyes	Finance	Finance	Active

Arrows: (1) the switch on Cathy Lim's row

This screenshot shows the same 'Users & Roles' page after the status of Cathy Lim has been changed. The toggle switch for Cathy Lim is now in the 'Inactive' position, and the word 'Inactive' is displayed next to the switch. A red box and arrow labeled '1' point to this updated status.

NAME	DEPARTMENT	ROLE	STATUS
Ana Cruz	Manila Ops	Dispatcher	Active
Ben Santos	Warehouse	Warehouse Crew	Active
Cathy Lim	Manila Ops	Dispatcher	Inactive
Rico Domingo	Warehouse	Warehouse Crew	Active
Grace Tan	Management	Manager	Active
Paulo Reyes	Finance	Finance	Active

Arrows: (1) the switch, now off

You should see: the message **Cathy Lim is now inactive** and the switch reading Inactive.

3 Hand over the leaver's work

Cathy still owns tasks. As manager (or admin), open the job's **Tasks** tab and choose **Reassign** on the task. Pick the new owner and due date and save. The job history records who changed it.

The screenshot shows the Top Movers Operations Portal interface. On the left is a sidebar with navigation links: OPERATIONS (Dashboard, Customers, Inquiries & Quotation, Shipment Jobs), and ADMIN (Audit Trail). The main area displays the 'Tasks' tab for a shipment job. At the top, it shows 'DECLARED VALUE: ₱410,000.00' and 'PRIORITY: High'. Below this is a table of tasks. The 'Lodge customs entry' task is marked as 'Overdue' and has a red 'Reassign' button next to it, which is circled in red with a red arrow pointing to it. Other tasks include 'Verify shipment documents complete' (Completed), 'Pay duties and assessment' (Pending), 'Secure delivery order' (Pending), and 'Book delivery truck' (Pending).

TASK	OWNER	DUE	STATUS	ACTIONS
Verify shipment documents complete	Cathy Lim	—	Completed	View evidence
Lodge customs entry	Cathy Lim	24 Sep 2026	Overdue	Complete, Reassign
Pay duties and assessment	Cathy Lim	05 Oct 2026	Pending	Complete, Reassign
Secure delivery order	Cathy Lim	06 Oct 2026	Pending	Complete, Reassign
Book delivery truck	Cathy Lim	07 Oct 2026	Pending	Complete, Reassign

Arrows: (1) Reassign on Lodge customs entry

The screenshot shows the 'Reassign task' modal form. It has three fields: 'Owner' (with a dropdown menu showing 'Ana Cruz'), 'Due date' (with a date picker showing '30 Sep 2026'), and a 'Save' button. Red arrows point to these fields: arrow 1 points to the 'Owner' field, arrow 2 points to the 'Due date' field, and arrow 3 points to the 'Save' button.

Arrows: (1) new owner, (2) due date, (3) Save

You should see: the task row showing the new owner and a **Task reassigned** entry in the history.

4 The colleague picks it up

Ana's **My Tasks** page now includes the job's tasks. The overdue one sits at the top, in its own Overdue section, so it cannot be missed.

My Tasks
Ana Cruz · Dispatcher

Overdue 1

JOB	TASK	CUSTOMER	DUE
SJ-2026-00082	Lodge customs entry evidence required	BlueWave Distribution Corp.	30 Sep 20

Upcoming 16

JOB	TASK	CUSTOMER
SJ-2026-00088	Pay duties and assessment evidence required	Pacific Rim Logistics Part

Arrows: (1) the job now on Ana's list

You should see: SJ-2026-00082 under **Overdue** on Ana's page.

5 See what a role cannot open

Each role sees only its own menu. Typing the address of a page the role may not use does not help: type `#/audit` at the end of the address while signed in as a dispatcher and the portal answers **Not available for Dispatcher**, with no data from that page.

Not available for Dispatcher

Audit Trail isn't part of this role's permission matrix. Switch roles above (Admin, for example) to see it, or adjust the matrix on the Users & Roles screen.

You should see: a plain message naming the role, and the menu unchanged.

THE SITUATION

Golden Harvest, the customer of the delayed job **SJ-2026-00065**, wants an update but has no login. From the sign-in page they open the tracking page and enter their job number, bill of lading number or container number.

WHO DOES THE WORK

Customer: no account

YOU END UP WITH

A plain, friendly status for the shipment, without any internal details.

1 Open tracking without an account

On the sign-in page, choose **Track a shipment**. No login is needed.

Arrows: (1) Track a shipment

2 Enter a number

Type a job number, bill of lading number or container number (capitals and spaces do not matter) and press **Track shipment**.

Shipment tracking

CUSTOMER TRACKING

Where is your shipment?

Enter your Top1Movers job number, bill of lading (BL) number or container number.

1 Job, BL or container number

2 SJ-2026-00065

Track shipment

Mockup: try SJ-2026-00120, BL-2026-04520 or TMWU-118899-2. Sample data only.

Arrows: (1) the number, (2) Track shipment

3 Read the status

The customer gets a plain headline, a timeline and, where relevant, an **Action needed from you** note (1). Not shown to customers: exception details, money, staff notes and internal status names.

Shipment tracking

SHIPMENT SJ-2026-00065

Customs clearance

On track Estimated arrival to be confirmed

From Ningbo, CN To Davao, PH

via Batangas, PH

Journey

1 Action needed from you

Customs duties are waiting to be paid before your shipment can be released. Please contact your Top1Movers coordinator.

Booked Completed

Arrows: (1) Action needed from you

You should see: "Your shipment is delayed" and a note that customs duties are waiting for the client, without the technical reason.

Where each scenario is tested

Every scenario in this manual corresponds to cases in the test workbook (UAT-test-cases.xlsx), so you can check the portal behaves as described. If what you see differs from this manual, treat it as a finding and log it there.

Scenario	Test cases that cover it
1. New customer to job	DSP-07, DSP-09, DSP-11, DSP-14, DSP-17, and the first steps of journey E2E-01
2. Paperwork and status	DSP-24, DSP-34, DSP-35, DSP-40 to DSP-46, DSP-50, DSP-51
3. Customs trouble	MGR-01, MGR-05, MGR-09, MGR-10, DSP-30
4. Delivery day	WHC-01, WHC-06, WHC-07, WHC-08
5. Funds, surprise costs, Finance	MGR-19, MGR-20, MGR-27, MGR-28, MGR-30, FIN-07, FIN-14, journeys E2E-03 and E2E-04
6. Audit and access	ADM-02, ADM-11, ADM-12, ADM-15
7. People come and go	ADM-01 to ADM-10, ACC-02, ACC-03, MGR-14, MGR-15, journey E2E-06
8. What the customer sees	CUS-01, CUS-07, CUS-08, journey E2E-02

Notes

- Screenshots were taken at a narrower window than a normal laptop screen so that text stays readable on the page. Your screen will show more of each page.
- All names, numbers and files are made up. Nothing is saved: refresh the page to start over.
- The workflow follows the client's written blueprint and standard customs-brokerage practice. It has not yet been confirmed line by line with Top1Movers' real operations, so wording and rules may change.
